

# SC800

## Facial Recognition Dome Camera

## Facial Recognition on the Edge

### Greater Intelligence, Lower TCO

Perform key processing tasks on-camera

Reduce network bandwidth and eliminate server hardware demands

Real-time face recognition and video analytics is now more affordable whether you deploy on one camera or hundreds

**SAFR SCAN brings NIST-leading live video face recognition and video analytics features to the edge.**

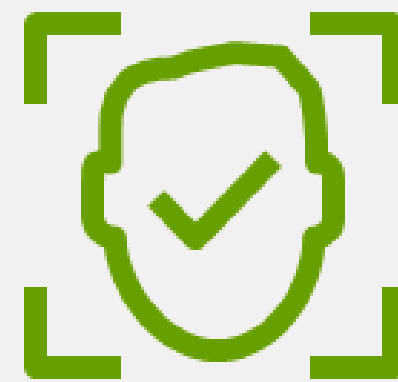

Embedded directly into the camera

SAFR utilizes onboard compute functionality

Eliminate server hardware and save an average of \$500 per camera on-premises

Leverage powerful video analytics capabilities in real-time

**Facial Recognition**  
99.9% recognition accuracy per NIST

**Live Video**  
The best solution for live video applications

**Watchlist**  
Automated identification of persons of interest
